

## THE WORLD OVER

CURRENCY ISSUES ARE SHELVED

STABILIZATION FUND OPERATES

JOY RIDING BY AIR IS A REALITY

85 YEARS OLD; WINE GOLF FINAL

SIXTY-FIVE CANDIDATES NAMED

**LONDON**—Troublesome currency issues were temporarily buried as the World Economic Conference plunged into other work with France proposing an immediate truce on quota restrictions.

While providing against any further use of the quota system as a weapon to curb importations, the plan would permit France to continue indefinitely the enforcement of quotas it has already adopted. The move was interpreted as a counter-stroke to the American demand for elimination of import discrimination.

British and French delegations insisted that international agreement could not be completed until dollar stability was achieved, but finally they joined in unanimous agreement to table the currency question.

The agricultural stabilization fund announced in the budget speech of the minister of finance, has been put in operation under regulations approved by the government-in-exile and announced by Sir George Perley.

Under the plan exports of certain Canadian products to the United Kingdom will be paid the difference between the amount of the proceeds of their sales at the present rate of exchange and what would have resulted at a stabilized rate of \$4.65.

The list of commodities to which the fund applies is limited to those mentioned in the budget announcement—cattle, meats, poultry, fresh fish, canned fish, tobacco, cheese, milk products, corned fruits, maple products, maple products, eggs and honey.

Later one night this week the staff of St. Hubert Airport, near Montreal, had word that an airplane was coming in, and they turned on the beacon lights. At 12:30 midnight the plane arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes, and a taxi was waiting, and it hurried them away to Montreal. Just before 4 o'clock the party returned, brought their plane and were back in New York for an early breakfast. Thus between sunset and morning these people travelled to Montreal, had three hours in that city and flew home in time for work. The cost of the outing was about \$500.

If the incident has a moral purpose it is that New York still has money for extravagant notions—and that the new hour has not destroyed the attractions of Montreal for its wealthy neighbors—Ottawa Journal.

**HOYLAKE, Eng.**—Hon. Michael Scott, at 55, the oldest player ever to win the British amateur golf championship, maintained the traditional uncertainty of this sporting classic by decisively beating Thomas A. Bours, a 30-year old countryman, in the 36-hole final match. Scott was the champion of Australia when Bours was a babe in arms. He never had advanced beyond the semi-finals before in the British event and that happened a dozen years ago.

**VANCOUVER**—Sixty-five candidates have been nominated so far to contest 47 seats in the legislature in the coming British Columbia elections. Of those nominated two are supporters of Premier S. F. Tolmie's Union party, 14 are Liberals, four support W.J. Bowser's non-Partisan movement 19 represent the Co-operative Commonwealth Federation and 19 are Independent.

The election date has not been set.

# The Carbon Chronicle

VOLUME 11 NUMBER 21

CARBON, ALBERTA, THURSDAY, JUNE 29, 1933

\$2.00 A YEAR IN ADVANCE

## Possibility of Gravelled Road Within a Year

Minister of Public Works Goes Attentive hearing to Local Delegation

\$2000 A MILE, COST OF GRAVEL

Last Wednesday a delegation comprising Messrs. S. F. Torrance, Percy Edwards and C. A. Dunsmore of Carbon and Mr. A. R. Claypool, M.L.A., of Swallow, met at Edmonton and interviewed Mr. J. Brownlie and Hon. O. L. McPherson, Minister of Public Works, on the matter of graveling the road from Carbon, seven miles south to the pole line.

The delegation stressed the point that the road was an absolute necessity and that in order to get a fair graded road a number of citizens of Carbon had subscribed over \$1000 towards the project and that the Municipal District of Carbon were doing the grading work. They told the government officials that a standard grade was to be made on this road.

The Premier and Minister gave the delegates a very attentive hearing and while they put up the usual hard luck story of funds, they left the local men and women with the impression that there was a necessity there was hope for the gravel—probably this winter.

The public officials explained that the cost of graveling this road would be in the neighborhood of \$2000 a mile and that the proposed 7 miles of road to the pole line would be at least \$14,000.

Should the government gravel this highway they would also maintain it and attempt to better the road. The delegation and Mr. Claypool came away with a feeling of gratitude to the public officials for their kind and attentive hearing and they have every hope that the road will be gravelled within the next year.

## Bank Montreal Crop Report

While conditions are fairly satisfactory in the Prairie Provinces, crops have suffered from intense heat during the past week and good rains are required over large areas to avert a serious effect. The grasshopper nuisance has become serious, and is causing damage in scattered sections of all the three provinces. In Quebec cool weather and lack of moisture has retarded the growth of crops generally.

**Northeastern Alberta**—Summer-fall wheat is 6 to 10 inches high and standing satisfactorily. Crops have not been seriously damaged.

**Southeastern Alberta**—Stubble crops in some areas are practically dried out. Crops in heavier soil are more satisfactory.

**Western Alberta**—Average height of wheat is 8 to 10 inches. Stubble crops in the southern portion are suffering badly from heat and dry winds. Sugar beet crops are doing well.

**Northern Saskatchewan**—Wheat has stood out well and has a healthy appearance. The average height is 10 inches. Cattle ranges are doing well. Southern Saskatchewan—Early sown wheat on light lands has suffered deterioration. Wheat is coming into the stubble fields. Given rains within a short time, there is still a fair prospect. The condition of coarse grains is fair to good.

## LOCAL WEATHER SITUATION

The weather, although somewhat cooler the past week, is turning warmer again, and still no rain during this month of June. The early snows—summer-fall and stubble crops are holding out well, but later crops are showing signs of burning now and rain is urgently needed if we are to have a large crop. The wheat is in the stubble in many fields and will stand two feet high in the early sown fields. One sample of barley taken from the 3rd. Oldshead field measured 28 inches in height and headed out.

## News of Carbon District Many Long Years Ago

At the congregational meeting of the United Church on Wednesday evening it was unanimously decided to issue a call to Rev. Jas. McCreedy of Edmonton.

School Report—passed from Grade 1 to grade 4—J. P. Dixon 70; D. Nash 69; O. Charlebois 64.

Sam Gray, resident of Carbon for a number of years, has disposed of his drying and cartage business to N. Anderson and A.R. Buffum. Mr. Gray will reside in Killebrew in future and will engage in farming.

J. A. Connolly, school principal, will spend his holidays in the vicinity of Youngstown.

Following the splendid rain last week the present hot weather is promoting rapid growth.

Miss Mary Williams is on holiday and Miss Myrtle Maxwell is looking after the local telephone office.

The Carbon school teaching staff for next year, Principal J.A. Connolly, will teach the senior grades, Mrs. N. Kitching will teach the intermediate grades and Mrs. Bruns the primary grades.

## ALBERTA NEWS

New Airports for Alberta

Two new airports, to be built as part of the unemployed relief program in the province, will be proceeded with shortly. The most important will be a seaplane base at Cooking Lake, east of Edmonton, built at a joint civic-provincial project, the province providing the necessary land and city of Edmonton to operate the port as an extension of its large airport in the city. The construction of this port will mean the transference of a large proportion of the six travel routes from Fort McMurray to Edmonton, as at present the passengers from the north must come to the capital city by train from McMurray. Another airport is to be built at Coleman with unemployed labour. About 150 men have been employed at Coleman Lake and the same at Coleman under the direction of the provincial relief commission.

Big New Sugar Warehouse

Construction of the large new sugar storage facilities at the plant of the Canadian Refineries at Raymond, near Lethbridge, is proceeding. The new plant will provide storage for four million pounds of sugar.

The Grasshopper Situation

During the past week the grasshopper situation in southern districts has grown more acute, and on a more widespread scale. Nearly 500 tons of poison bait per day are being sent out, and the area of infestation has now reached as far north as the C.P.R. Premier House, and west of Lethbridge to Pincher Creek.

## Feathered Stowaway

A pigeon that found itself "in the soup" was taken care of by a butcher, but it never made the front page a few days ago when the Canadian Pacific liner "Empress of Britain" arrived at Quebec from Southampton with a homing pigeon on the list as a stowaway. The pigeon, eyeing the camera with a quizzical expression, is seen above in the hands of J. Gibson, Chief Butcher of the Empress line in whose keeping all travelling pets are placed.

Battered by storms after giving heavy lead winds for a number of hours the pigeon, which had been released some 250 miles west of Land's End in log from the steam trawler "Ocean Lass", fluttered to rest on the deck of the Empress of Britain. It carried a message, showing time and place of release, and date of its last feeding. On the return of the big liner to England next week the feathered stowaway, after its two way crossing of the Atlantic will be thrown into the air to find its way home, with a message from Capt. Latta tied to its leg, in authentication of the strange journey it will have to take.

## Farmers May Consolidate Tax Arrears Under New Act

For the purpose of encouraging property owners to liquidate any arrears of taxes, and also to give better opportunity to those whose lands may have passed under the tax recovery act to regain title or at least protect their property from sale, the provisions of the new tax consolidation act, passed at last session of the legislature, have now been brought into effect and may be taken advantage of. The act provides for arrears of taxes of more than three years standing as at the beginning of 1932, to be consolidated, and payments made in six annual instalments, each to be paid not later than December 15th in each year. The first instalment is to be ten per cent of the consolidated arrears, the second instalment ten per cent, the third 15 per cent, the fourth 20 per cent, the fifth 25 per cent and the sixth 25 per cent. Those wishing to avail themselves of the advantages of the new system will be required to apply in writing to the municipalities before October 1. Owners of land whose taxes were consolidated under the acts of 1931 and 1932 may come under the new agreement by making application up to October 15. The statements collected under the new system will be pre-arranged among the various taxing authorities involved.

The new act provides also for certain discounts on the payments of the instalments of arrears, as follows: For arrears of six years and more, 25 per cent; arrears of five years, 22 per cent; of four years 18 per cent, of three years 14 per cent, and of two years nine per cent. These discounts will be computed, not on the total amount of the consolidation, but separately on each class of tax involved. That is, the portion of the consolidated amount which is due on supplementary revenue is in arrears for six years, then the 25 per cent discount applies. If that portion of the total which is due to another class of tax is in arrears for only 18 per cent, that 18 per cent discount, and so forth.

The act also assists those whose property is at present under the tax recovery act, by permitting them also to make an agreement to pay up arrears under the new act, and on completion of all the requirements of the agreement, regain title to their lands. This applies to owners of two acres or more. A special additional discount of five per cent is allowed those who can pay the entire consolidated sum in one instalment. The discount is computed on the net amount of arrears due, after the other discounts have been deducted.

Relief Agreement Renewed

The relief agreement between the province and the federal government has been renewed to the end of the year, according to an announcement by Premier Brownie, who returned this week from Eastern Canada.

## GHOST PINE M. MAY BUY LINE OF TELEPHONES

Building the very unsatisfactory state their rural telephone business is at present, the Ghost Pine Farmers have taken the matter up with the Government as to the possibility of the community taking over the operation of their own branch lines, and by reducing the monthly rate, increase the number of subscribers.

In order to test the feasibility of the plan, the farmers have been submitting, through Mr. Claypool, and Mr. Buck of the telephone department, the Ghost Pine lines were created for a subscribers list of 128 at a cost of around \$100,000. There are now only 15 phones left. Some 75 miles of line are still standing, but probably 50 miles might be profitably operated.

Unless something is done to improve the situation these lines will eventually be scrapped, therefore the government is prepared to take a loss and sell the property, in working order, at the same price, since the government has been disposing of the motor line recently salvaged after last year's flood. This means a net for the fifty miles of line all complete, at about \$100,000 on terms of half cash.

For the linking up with town centers, a charge of 75¢ per quarter would be made. The cost of their own service might run to 50¢, making a net of 25¢ per month for each subscriber.

The meeting decided in favor of the project and a committee to continue negotiations and interview possible subscribers was appointed.

Prominent Visitors

Among the interesting visitors to visit Alberta during the past two weeks was the party of 31 delegates to the World's postal congress, headed by Sir Frederick Williamson, C.B., director of the British postal service.

## GOOD PRIZES AT DIST'CT TENNIS TOURNAMENT

The District Tennis Tournament to be held at Carbon on July 1st and 2nd has attracted a large number of entries for the event. In addition to Carbon entries have been received from the following towns: Anne, Rossmore, Elmore, Crossfield, Drumheller, Rockyford, Trochu, Hanna, Hoothell and Thors. Play will start at 8 a.m. on July 1st and a full two days of tennis will be held with a quality to please most ardent tennis fans.

Good Prize List

The prizes which are on view in the window in W. A. Brindley's store, are as follows:

Men's Singles—first prize, a silver rolling pin, engraved. Second prize, a silver sweater.

Ladies' Singles—first prize, a silver cup, engraved. Second prize, a case.

Men's Doubles—first prize, two smoking cabinets, second prize, 2 Albums.

Ladies' Doubles—first prize, two sets of shirts, second prize two sweaters.

Mixed Doubles—first prize, sweater for man and Electric Hot Point iron for lady. Second prize, fountain pen for man and best for lady.

Second prizes will be given in all events where there are sixteen or more entries.

## Southern News

Mr. and Mrs. J. J. Berthel made a trip to the Pileton on Sunday to see their son, Wito Schmidt. They returned that evening.

Mr. and Mrs. Ed Harsch returned home on Wednesday after spending a week at Carbon on July 1st and 2nd has attracted a large number of entries for the event. In addition to Carbon entries have been received from the following towns: Anne, Rossmore, Elmore, Crossfield, Drumheller, Rockyford, Trochu, Hanna, Hoothell and Thors.

Mr. and Mrs. Fred Zeiler spent the weekend at Trochu visiting with relatives.

Mr. and Mrs. John Hoyer and Mr. and Mrs. Andrew Joyner returned on Saturday from Shelby, Montana.

Albert Berthel and B. Berthel made a trip to Drumheller on Monday.

Mr. Gottlieb Klein left for Wainwright, N.D. to visit with his brother, Rev. Fred Klein.

Mrs. Otto Adlert visited with his sister, Mrs. Adam Berthel, at Carbon for a few days this week.

John Mueller of Banister conducted services at Bethel church on Sunday, July 1st. Ministers from the United States to Edmonton, 2000 miles and states that the cross around Carbon looked better than anywhere on his trip.

"Fresh from the Gardens"

## Who Owns Canada?

The question which appears as the heading of this article was included in examination papers recently submitted to pupils in Montreal schools coming under the jurisdiction of the Catholic School Commission of that city. Answers to the question revealed such vague and uncertain knowledge regarding the status of the Dominion that the Commission appealed to the Secretary of State at Ottawa for an authoritative definition of Canada's status within the British Commonwealth of Nations, and among the world of nations.

The answer, given over the signature of Hon. C. H. Cahan, Secretary of State, defines Canada as a self-governing state of the British Commonwealth of Nations. It sets forth that Great Britain does not own Canada any more than Canada owns Great Britain; that Canada and Great Britain are each independent members of the British Commonwealth, and that the Dominion belongs to the people of the Dominion.

This answer should set at rest a large amount of uncertainty among Canadians regarding the official status of the land of their birth. It was evident from the answers submitted in the school examinations at Montreal that the subject had not been sufficiently emphasized by the teachers, and the secretary of the Catholic School Commission has stated that in future more attention will be paid to it. It would be well if this were not only in the Catholic schools of Montreal, but in all schools throughout the Dominion.

Canada is today an absolutely free and independent nation—just as much so as any other nation in the world. The King of Canada is George VI. He is also King of Britain, King of Australia, Emperor of India. In Canada the King is represented by the Governor-General, who is appointed by the King on the advice of the Government of Canada. At one time the Governor-General was appointed on the advice of the Government of Great Britain, and he represented that Government, as well as the King, in Canada. But now the Governor-General is appointed by the King on the advice of the Government of Canada, and he represents the King in Canada, as well as the Government of Canada.

The term and status of "Commissioner" is employed between two Ministers of the British Commonwealth, because each have a common sovereign and must represent him as an Ambassador or Minister to represent him to himself as he does to represent him to other sovereigns. The Crown being represented in the person of the Governor-General, the King's several governments are represented the one to the other by Commissioners.

The question may be asked: If Canada is an independent, fully self-governing Dominion of the British Commonwealth of Nations, why does it not enjoy the power to amend its own constitution, and why are appeals taken from decisions of the Supreme Court to the Privy Council in Great Britain? Other nations, it may be urged, have power to amend their own constitutions, and their Supreme Courts are final courts of appeal.

The answer is, that Canada can exercise both these powers whenever the people of Canada desire to do so, and probably the time will come when they will so decide. Up to the present, however, Canada has preferred to leave to itself the right of carrying judicial appeals to the imperial throne of the Privy Council, especially in all matters in dispute between the Federal and Provincial Governments. There is no compulsion that it should do so, and it can refrain from so doing, or can abrogate that right should it deem it wise to do so.

So, too, in regard to amendments to the Canadian constitution. The B.N.A. Act created a confederation of Provinces, reserving to the Dominion certain exclusive powers on the one hand and certain other powers to be shared by the Provinces on the other hand, while in regard to some matters jurisdiction was divided between the two authorities. The Provinces, therefore, have as much right as the Dominion itself to say when and how the constitution shall be amended, and up to the present time certain of the Provinces have preferred to leave the matter as it was at the time of Confederation, with the British Parliament making such amendments to the constitution of Canada as the Dominion of Canada, with the consent of the Provinces, may request. But Canada can secure full and final control over its own constitution if and when the people so desire.

So, the complete and final answer to the question "Who Owns Canada?" brings us back to the definition given by the Secretary of State at Ottawa.—the Dominion belongs to the people of the Dominion. They are masters of their own national destiny. Nobody can tax them but themselves; they pay tribute to no other nation. Canada can make its own treaties with other nations irrespective of the effect such treaties may have upon other Dominions of the British Commonwealth.

But, because the Dominion belongs solely to the people of the Dominion, the great responsibility rests upon them as citizens of a sovereign nation among the nations, with absolute equality in the League of Nations, to so govern themselves, and to so conduct their national and international relationships, as to command the respect of and wield a great influence for good in the world. There should be no spirit of a narrow nationalism in Canada; quite the reverse.

## Mayers Are Youthful

The new mayor of Detroit is 31 years old and everyone is commenting on the fact that he is so young. It is youthful to be assuming such a heavy responsibility. We should like to see Mayor Nab, at Peterborough, who is 25 years old and who is now well on his second term. He was 30 when he took on the job and, furthermore, he had had no administrative experience.—Borden City Star.

## Railway Man Solicitor

Recently J. F. Fringle, general superintendent of transportation on the fact that he is so young. It is youthful to be assuming such a heavy responsibility. We should like to see Mayor Nab, at Peterborough, who is 25 years old and who is now well on his second term. He was 30 when he took on the job and, furthermore, he had had no administrative experience.—Borden City Star.

Of course women are vain creatures who like to be looked at by you; you noticed who does the most. The temperature at this season marching in parades.

## Summer Complaint Plays Havoc With the Bowels

Many people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it. You cannot tell when it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry. It will give you relief as quickly as it will give relief. Manufactured only by Dr. T. Milburn Co., Limited, Toronto, Ont.

## Chemical Products

Depression Does Not Seem To Affect Demand For Toilet Preparations

It is evident from the study of the recently issued preliminary report on the production of chemicals and allied products in Canada in 1932 that the depression has practically no effect on the demand for toilet preparations. In 1929 the selling value of these preparations at the plants where they were made was \$1,018,292. In 1931 the value of the output had risen to \$2,496,292 and in 1932 it had risen to \$3,545,134.

The demand for medicinal and pharmaceutical preparations continues on the upgrade. In 1928 the combined value of these products made in Canada was \$17,224,351 and in 1932 it was \$18,415,573, the high mark of \$10,038,894 being reached in the memorable year of 1929 when for several months prices of every commodity were at their highest point.

The chemical and allied products industry in Canada is a substantial one. Last year the aggregate production had a value of \$95,040,840. It is divided into 14 groups and there are 628 factories, most of which are in the Provinces of Ontario and Quebec. The 14 groups are as follows: coal; distillation; acids, alkalies and salts; compressed gases; paints, pigments and varnishes; soaps and cleaning compounds; more than 100 pharmaceutical preparations; toilet preparations; fertilizers; wood distillation; lumps; adhesives; polishes and greases; flavoring extracts; and miscellaneous chemical industries.

Imports into Canada under the classification of chemicals and allied products were valued in 1932 at \$2,861,880. About 62 per cent of \$1,775,161 was purchased from Great Britain and 17 per cent from the United States. Exports from Canada increased slightly in 1932, the total value being \$1,033,179 as compared with \$1,048,846 in 1931. The United States, Mexico, Portugal, France, New Zealand, Holland, Canada, China, India, Netherlands, Cuba and China in the order named were the main purchasers of Canadian chemicals and allied products.

## Membership Shows Decrease

Quakers Are Having Controversy Over Members By Birthright

Membership of the Society of Friends in the Quakers—showing a slight decrease in Great Britain during the last 12 months. There are now 19,119 registered members compared with 19,218 in the peak year of 1916.

The Society of Friends is one of the oldest Christian churches. A child is accepted at birth, without either baptism or, at a later date, confirmation or confession of faith. This birthright membership has recently been seriously criticized, and it is now possible for Quakers to be expelled from the membership of their children until the young people are of an age to decide theological matters for themselves.

Last year the society accepted by conviction 219 new members, 47 fewer than in 1931, while 132 individuals either resigned or were disowned or dissociated. There were registered 89 "birthright" members and 50 minors, but 218 Friends were lost to the society by death.

## More Freight Moving

Transportation Situation Shows Signs Of Improvement

The transportation situation in Canada is showing considerable improvement and reflects the increasing confidence of the buying public and improving internal and external trade. The Department of Trade and Commerce, Carloadings for the week ending June 10 numbered 10,000, an increase of nearly 2,000 cars over the preceding week and representing the largest movement of freight in 24 weeks.

"Movement of merchandise freight, representing as it does the shipments from manufacturers to wholesalers and wholesalers to retailers showed a marked improvement," said the bulletin. "Movement of merchandise by railroad has climbed up to new three-quarters of normal while that via canal boats in May was approximately double that of the corresponding month last year. Iron ore passing through the Sault Ste. Marie Canal was heavier by over 6,000 per cent, and continuous work was practically double that of May, 1932."

There is a saying that heaven will protect the poor working girl "that who will protect the guy she is working?" asks a college wisecracker.

## HAD RHEUMATISM FOR 20 YEARS

But None Since 1930

This man must have something like a record for suffering. He says: "I have been suffering from rheumatism for 20 years—since 1910 up to 1930. I have been free from that dreadful pain, simply by taking Kruschen Salt. It is a real cure. I must say that 20 years is a long time to have that awful rheumatism pain about one's joints."—W. P.

Your rheumatism is just like his and everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen Salt dissolves those crystals away. Furthermore—if you keep up the "little daily dose" ever afterwards, it will never be possible for them to form again. Rheumatism will be gone for good.

## Joy-Riding By Air

New York People Have Money For Extravagance

Late one night the staff of St. Hubert Airport, near Montreal, heard that an airplane was coming in, they turned on the beacon lights.

At 12:30 midnight the "plane" arrived from Roosevelt Field, New York. There alighted two men and a woman, in evening clothes. A taxi cab was in waiting, and it hurried them away to 300 Madison street.

Just before four o'clock the party returned, boarded the "plane," and were back in New York for an early breakfast.

Thus between sunset and morning these people travelled to Montreal, where they stayed in the city, flew home in time for work. The cost of the outing was about \$500. If the New York still has money for extravagant notions—and that the new breed has not destroyed the strong attraction of Montreal for its wealthy neighbors.—Ottawa Journal.

## Use Of Anti-Toxin

New Treatment Of Diseases Of Children Is Reported

New developments in treatment of the diseases of children have been reported. A new and powerful cough, were reported to the American Medical Association.

There is hope that it will be possible to immunize infants against whooping cough just as they are protected from diphtheria, by treating them with a vaccine, said Dr. Louis W. Sauer, of Evanston, Ill.

Tests showed, he said, that not one of the children vaccinated contracted the disease.

Use of anti-toxin in cases of scarlet fever has been demonstrated to reduce severity of the disease and its dreaded complications. Dr. Luke W. Hunt, of McCormick Institute for Infectious Diseases, Chestnut Hill, Pa., summarized study of more than 2,000 cases.

The anti-toxin should be given within the first day or two after the patient becomes ill with scarlet fever, he said.

## Smashing the Atom

Powerful Hammer Devised By Scientists Accomplishes Feat

The most powerful hammer yet devised for smashing the centres, or cores, of atoms, which are believed to hold the secret of how all matter is built, was described before the American Association for the Advancement of Science.

This atom-smashing hammer is the deuterium, the infinitely small but enormously powerful core of the heavier of the two isotopes of hydrogen which is fired like a bullet into the cores of atoms that are to be smashed.

The results of its use were reported by Dr. Gilbert B. Lewis, of Stanford University and Ernest O. Lawrence of the University of California.

## Removed Half Of Brain

Removal of almost all of the right half of a woman's brain with no noticeable effect on her mentality and only partial paralysis on the left side was reported to the American Medical Association. Twenty months after the operation, Dr. Gardner said, "examination disclosed no change in intellect."

The Irish Free Press expects many visitors from America this summer.

**DON'T SUFFER FROM PILES**

Use Dr. Chamberlain's Pile Remedy

**MECCA PILE REMEDIES**

## Permanent Exhibition

Planned For London

Alexander Palace May Be Turned Into Amusement Place

There is a prospect of London being endowed with a permanent "Venetian Exhibition." The Alexander Palace, on the northern heights of London, Eng., which has long been the depository of all concerned with it, has been taken in hand by no fewer than 18 local artists who have recommended grants for its modernization which will amount to \$1,000,000. It is proposed that the palace shall be so renovated as to convert it into a first-rate place of exhibition and general amusement.

The history of the Alexander Palace is a dreary one. It was opened exactly 60 years ago as a northern rival of the Crystal Palace, which stands on the southern hills bordering London. A fortnight after its opening it was burned out. Shortly after it had been rebuilt it was compelled to close owing to lack of funds, and remained closed for nine years.

For 20 years following it had a fitful burst of enterprise. At length money was subscribed to save the work from falling to the speculative house builder. The project now extends to almost 200 acres, was a valuable acquisition, but nobody ever had the money to make the project effective with the great sprawling place itself. During the war it made a useful, first as a barracks for Belgian refugees, and later for German prisoners.

The good thing in the Palace was the great organ. It was the masterpiece of "Father" Henry Willis, Master-lovers of North London for years back contrived to find the money to make the organ as good as new, and week-end concerts at the palace have been popular.

## Social Progress

Must Keep Pace With Scientific Advancement, Says Hon. R. J. Manion

Social progress must keep pace with scientific advancement in order to bring about an equitable distribution of the world's products. Hon. R. J. Manion, Minister of Railways and Canada, told the Canadian Electrical Association at their annual banquet at Lacrosse-in-Quebec.

Mr. Manion urged that not only public men but business men and workers must give attention to bringing about radical reforms that would create a greater number of the people to enjoy the benefits of what they produce.

The minister made electrical development the theme of his address but touched on the problems of the day and the world economic situation. It was inconceivable, he said, that the conference would fall to discuss the world economic situation, but he did not anticipate any difficulties would arise.

Canada was in an excellent position to act as an intermediary, he said, but he did not anticipate any difficulties would arise.

The vast majority of people in Canada were opposed to the export of electricity, not only because it was a disservice to industry in the Dominion, but because of the great difficulty in shutting off power from a friendly country once commitments had been built up in the power exporting area.

## Cypress Hills Park

Highest Elevation Of Any Part Of Saskatchewan

Cypress Hills Park, known as the Highlands of Saskatchewan, will be officially opened this year. The crest of the two miles south of the town of Cypress is the highest elevation of any part of the Province of Saskatchewan. Some of the streams in the park flow south to find the Missouri River and some flow north to join the Saskatchewan River and clearers of the Cypress Hills park is 4,500 feet above sea level and part of it is even higher than Banff, the famous mountain resort in Alberta. New buildings in the park include one lodge with 18 large rooms and a number of log cabins.

French Radio Licensed Under the New Finance Law radio owners in France must have a license. Owners of crystal sets are compelled to pay \$1 a year, and owners of valve sets \$2.35 installed in places where the public may listen are licensed for \$6.50 or \$12.50 if the public pays an admission fee.

Flax was grown on 24,000 acres in England in 1930; nowadays probably the only flax produced is on the King's Sandringham estate.

England's Russian population now totals 67,025.

## Ingenuous Excuse For Speeding

Thought Fly Engine Was Coming Said San Francisco Girl

The excuses proffered by our young women motorists when caught speeding are curiously lame and hackneyed complaints a correspondent of the Manchester Guardian writes.

"Why not emulate a girl friend over in San Francisco, who declared, truthfully radiating from her big blue eyes, that she thought a fire engine was behind her, and that it was up to her to hurry to get out of the way. She was chased by motorcycle police men, and did not stop until two shots had been fired by them. Why are not our own traffic police encouraged by 'the Yard' to tackle their job in this modern and virile way? At least a machine-gun might be stationed at busy spots along bypass roads during summer weekends to increase respect for the law, even if it were to fire only blank."

**Tax-Free Bond Ruling**  
Tax-free income bonds forfeit that exemption when they are paid out by a company to its shareholders in the form of dividends. This was the judgment of the supreme court of Canada. Mr. Justice Lamer dissenting on an appeal taken before it by D. J. Watrous of Brampton. The judgment dismissed the appeal with costs.

An historian announces that women used cosmetics in the Middle Ages, but she still uses cosmetics in the middle age.

More than 10,000 Alberta silver fox furs were placed on sale at the first annual sale of pelts in London this year.

## FRANCO-U. S. TROUBLE WAS SOON ADJUSTED

London, Eng.—The secret meeting at which Franco-American differences were adjusted provided the most dramatic incident since the inception of the world economic conference. The meeting was held in a private room in a secluded part of conference headquarters.

Prime Minister Ramsay MacDonald, president of the conference, knew the full import of the meeting. Veterans of innumerable international conferences, he remained alone in an adjoining room, pacing the floor, his hands clenched. Back and forth, back and forth, he walked, his slurred head bent toward the door, listening for the knock which would mean that the meeting was over and that it had collapsed.

When Mr. MacDonald was informed his face lit up with joy.

At a press interview Cordell Hull, the United States delegation leader, declared that undue emphasis had been placed on the importance of the stabilization and that the United States deems such action now "un timely."

## Snow Slide Victim

Find Bodies Of Two Men Lost Since Last February

Field, B.C.—One man falling above rock and meeting snow had led to discovery of Chris. Dean, 26, and his brother, John, 28, in Duchesne Pass since February. The young men, both residents of Banff, Alberta, were trapped in snowdrifts in the pass. They attempted a ski journey from Camp Hector to field, 30 miles through the snowdrifts. Work parties will leave here to dig the bodies out of the debris.

Discovery of the bodies was made by two Swiss guides, Hans and Hans, and C. Haesler, who were conducting a search of the pass. Searchers have been made previously, but the young men disappeared, a brother Frank, 20, making trips through the area at every opportunity. Parents of the young men reside at Banff.

## Famous Racing Motorist Dead

Mr. Henry Birkin Was Victim Of Blood Poisoning

London, Eng.—Despite a desperate battle by doctors, Capt. Henry Birkin, 36, a famous racing motorist, died in a London nursing home from the effects of blood poisoning resulting from burns received in the Tripoli Grand Prix in May.

Mr. Birkin had been critically ill for three weeks, and three blood transfusions were tried.

He had been one of Great Britain's leading drivers since 1927.

Mr. Birkin was born July 26, 1896. He succeeded his father in the baronetcy in 1921. He was created a knight in 1935. He served in the war from 1914 to 1918.

## Trouble Over Taxes

Ten People Reported Killed In Riots In Poland

Warsaw, Poland—Nine persons and one policeman were officially reported killed when police forced peasants to cease beating tax collectors in the Galician districts of Ropczyce, Rzeszow and Lancut. Sixteen persons were seriously wounded. Many arrests were made and numerous peasants escaped to the forests.

## Grasshopper Invasion

Winnipeg, Man.—Thirty thousand acres of green crops in Winnipeg municipality, southwest Manitoba, were threatened with destruction by an invading horde of grasshoppers as western Canada's wheat lands, baked by a scorching sun during last week's heat wave, failed to receive the much-needed moisture promised.

## Thief From Mint

Ottawa, Ont.—John R. Wallace, a member of the Royal Canadian Mounted Police, pleaded guilty in police court here to stealing \$65 in gold coins from the Canadian mint. He was remanded for sentence.

Honors For Einstein  
Brussels, Belgium—The University of Brussels recently conferred upon Prof. Albert Einstein the title Doctor Honoris Causa of the faculty of sciences.

W. N. U. 2000

## Aids To Navigation

To Install Direction Finding Stations In Hudson Bay Area

Ottawa, Ont.—Paving the way for renewed efforts to reduce insurance losses on the Hudson Bay route, the federal marine department will shortly commence construction of a short wave direction finding station at Chesterfield, on the east shore of the bay, a considerable distance north of Churchill.

Installation of additional navigation lights in the strait will not be undertaken this year. The department has no funds for this purpose and, in addition, further survey work is necessary to determine the precise location of the points at which lights would be erected.

It is necessary to be able to mark all lights on navigation charts with absolute accuracy so that navigators when they see a light may fix their position. Hitherto a detailed hydrographic survey of the north shore of the strait has not been carried out and if lights were built this year only approximate position could be given.

The direction finding station at Chesterfield is considered the most important contribution to the Bay route that may be made at this time. This station will give bearings on the line from Nottingham Island to Churchill. At the present time there are stations at Chesterfield and Churchill but bearings are difficult to obtain.

This is the official reaction to the report of the Imperial Maritime committee on the Hudson Bay route.

## Aeroplane Tragedy

Capt. Broach and Two Mechanics Lost Lives In Air Crash

Prince Albert, Sask.—The first aeroplane tragedy of the year in northern Saskatchewan claimed the lives of three men near the Brooks air base at Emma Lake, 30 miles from Prince Albert, last February. The dead are: Capt. B. W. "Bill" Broach, pilot, 42, Hiram C. Brooks, pilot-mechanic, 24, T. D. Forsyth, mechanic, 28.

Broach, well known western commercial flyer, who served with the Royal Navy Air service France and later with the famous Dover patrol, was testing a reconnoitered Bluff plane at an altitude of 2,000 feet when he was struck by Brooks and Forsyth, mechanics of the Brooks Airways, Prince Albert.

One of the results of their tests the plane dropped in a spin for some unknown reason and plunged into a bay of the lake just north of the air base, at 4 o'clock in the afternoon, after the machine had been about to several spins and loops by the pilot, who was falling into about 10 feet of water, was smashed to pieces and the engine buried in the bottom of the lake.

The bodies of Broach and Forsyth were recovered shortly after the crash, while Brooks' body had not been recovered until late in the afternoon, after the machine had been dragged for the third body.

Forsyth, mechanic, was scarcely recovered when Brooks' head was badly smashed. Brooks was the son of R. D. Brooks, of Prince Albert, president of Brooks Airways.

## Lord Montagu Is Fined

Found Guilty Of Common Assault On John Forbes

Victoria, B.C.—Lord Edward Montagu, the second son of the Duke of Manchester, was found guilty of common assault on the person of John Forbes on June 15 and was fined \$50 and \$7 costs, or, in default, ten days in jail, by Magistrate George Jay in provincial police court here. W. Brooker, co-defendant, was found guilty of assault causing grievous bodily harm, and was fined \$50 and \$7 costs, or, in default, ten days in jail. Montagu's fine was paid and he was freed.

## Organization Dissolved

Berlin, Germany—The Steel Helmet Veterans' organization through the Reichland has been dissolved its offices and houses closed, and other property temporarily seized. The dissolution was said to have become imperative in order to "cleanse the organization of Marxist and Communist elements, as well as bad political leaders and preserve it as a non-political defense of the troops."

## Guile Save Crops

Woolfville, N.B.—Farmers who till the soil of the Grand Pre Meadows turned thankful eyes to fields with the guile of Fundy—guys who are taking millions of grasshoppers which had threatened to ruin the crops.

## Review Tariff

Britain Asks Canada To Discuss Duties On Long List Of Articles

London, Eng.—Taking further advantage of the terms of the Canadian-United Kingdom trade agreement, signed at Ottawa, the United Kingdom asked Canada to review the Canadian duties on a long list of articles, with a view to revision. The Canadian tariff board is already preparing to review the duties on cotton and textile goods imported from England.

The trade pact signed at the Imperial Conference gives each country the right to seek revision in the scale of duties levied by the other on its goods.

## Taking Part In Gold Rush

Many Indians Using Sailing Canoes To Reach North

The Pas, Man.—Fleets of sailing canoes, loaded to the gunwales with freight in many cases, are now drifting ahead of the breeze of the northern lakes, heralding the new summer's gold rush in Goin's lake.

The purr of the outboard motor is heard right across the hinterland. Five canoes without the least to secure outwards, have jumped into the "rush" with canoes, and are swinging paddles, oars and sweeps, as they freight their way into the mineralized zone.

## PROPOSAL IS MADE TO REDUCE WHEAT ACREAGE

London, Eng.—The four-power wheat conference adjourned discussions to await statistical information on production from Australia, Argentina, and Soviet Russia after formulating a tentative plan calling for reduced acreage and export quotas.

News of extensive crop damage in Canada and a short crop in the United States caused delegates to believe the final position may be changed materially.

Stanley Bruce, Australian minister to the United Kingdom, asked that the conference produce some concrete proposal which he might transmit to Canberra for consideration of his government.

It was learned the limitation proposed as now constituted, contemplates reduction of acreage by 15 per cent. for one year only and that the program for the second year would be decided after the effects of the one-year reduction are seen.

Canada, the United States and Argentina were reported agreed with the Polish stand that small production must be brought into any scheme if disaster is to be avoided.

The Soviet had not been brought into debate yet but some quarters were inclined to view the move to enlarging the wheat production as being possible without participation of Russia despite that country's short crop this season.

Limitation of production by way of reduced acreage and the curtailment of exports by a quota system among the nations are the main lines on which the conference is working, while at the same time urgently pleading for some agreement by importing nations on methods whereby they might raise consumption.

The Daily Telegraph said it was informed the world economic conference will begin immediate discussion of a plan for reducing the wheat production of the world by 15 per cent. and absorbing the total carry-over in two years.

## REPRESENTS CANADA

Dr. Frank D. Adams, Emeritus Vice-Principal of the Faculty of Applied Science and Logon Professor of Geology and Paleontology at McGill University, who has been appointed to represent the National Research Council at the International Geological Congress which is to meet in Washington from July 22 to 29.

A clause in the new act, passed by congress, stipulates that if the securities offered in the United States in order to make a public offering of its securities within the United States, such public offering must have been made in the United States.

Some other facts interesting to foreign governments or corporations wishing to sell securities in the United States are set forth in the new law below:

Truthfulness and adequacy of the information furnished to purchasers of foreign securities under the act are made the direct responsibility of U.S. investment houses floating them.

All data relative to the financial status of the government or foreign corporation for which funds are intended to be raised must be furnished by the agents in the United States to the federal trade commission.

Just as domestic securities, foreign securities must be registered with the federal trade commission.

German Jews Need Help

Opinion of Man Who Investigated Conditions Created By Nazis

New York—Michael Williams, who investigated conditions in Germany in the American committee on the rights of religious minorities, said in an address that Nazi opposition to Jews "far exceeds any other persecution known in modern times."

"If the Jews are to be rescued, if their position is to be ameliorated in any important degree, it is vital that an international body be set up, qualified to speak and act for the Jews of the world."

Has Increased Staff

Welland, Ont.—With prospects of a bumper wheat crop in western Canada which would necessitate an increased demand for binder twine, the Plymouth Cordage Company's plant here has taken on an additional 150 men.

Distinguished Figures in World Conference

Canadians occupy a prominent place in the World Federation of Education Associations which is to hold its fifth Biennial Conference in Dublin, Ireland, this month. It will bring together outstanding educational leaders from forty or more countries with the object of cultivating and developing international good will and exchanging views on educational matters. The Dominion is represented by Harry Charlesworth (centre), Vancouver, B.C., as vice-president of the organization; Dr. E. A. Hardy (right), Toronto, as Treasurer, and Dr. D. D. MacDonald (left), Toronto, a member of the board of directors.

## Cannot Help Manitoba

Federal Minister Of Trade and Commerce Says There Is No Co-Operation

Winnipeg, Man.—"The Dominion Government cannot help Manitoba Bracken to finance provincial unemployment and other money issues because he will not play the game with us," Hon. H. H. Stevens, Federal Minister of Trade and Commerce, said in an interview here.

"During the past three years," he continued, "the Dominion Government has earnestly tried to co-operate with the four western provinces. In three provinces they have been successful, but in Manitoba no reciprocal co-operation was forthcoming."

"Not once but repeatedly Mr. Bracken has used the unemployment financing issue for political purposes, which makes it difficult for the Dominion Government to assist the province. I do not think Mr. Bracken has made the efforts which he could have made to handle the relief question."

Predicts Stratosphere Flights

New Type Airplanes Will Make This Possible Says Piccard

New York—Professor Auguste Piccard, arriving from Europe, said that on the strength of his studies he believed the efforts which he could have made to handle the relief question.

"These 'planes should go between 450 and 500 miles an hour," he said. "They will have little resistance because the air at that altitude is so light."

"Once the 'plane reaches such a height the pilot can set the course and cross from America to any point in Europe in a few hours."

Piccard will go to Chicago, where he will advise preparations for the stratospheric balloon flight of his twin brother, Jean Piccard, and Commander S. Settle of the United States Navy.

## STABILIZATION OF CURRENCY BONE OF CONTENTION

London, Eng.—Prime Minister J. Ramsay MacDonald, chairman of the World Economic Conference, was said to be seeking elimination of the monetary stabilization question which constitutes the bone of contention at the party.

The French delegation failed to carry out threats of separating at the moment of the conference, but the United States dollar should be stabilized, but the feeling of anxiety over the problem continued intense in conference quarters.

Quarters were clearly disturbed by the solid vote of many countries opposed to dollar instability and it was unofficially pointed out in comment that one of the chief points of the Washington program was stabilization as soon as practicable along the lines laid down in the resolution submitted by Senator Ford Pittman.

A succession of speakers pleaded for monetary stabilization as essential to restoration of confidence, including representatives of Italy, Switzerland, Poland, Norway, Germany, Hungary and Yugoslavia.

The discussion arose during consideration of a British resolution calling for easy money and cheap credit.

The conservative gold standard countries doubted the feasibility of the program and warned of its possible dangers.

Thunder fires are burning at several places in the eastern section of the Lesser Bore district, causing considerable damage, and all available men in the area were drafted to fight them.

A Canadian National Railways bridge was destroyed near Homebush, temporarily cutting off communication between Long Lac and Port Arthur.

Brighter Outlook

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had found numerous new men employed in mining, lumbering and manufacturing, Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging.

"Transportation is decidedly brighter," he said. "Carriage and passenger transportation both show marked improvement. Cattle are moving well and 40,000 head will be shipped to Britain this season."

Was Friend To Animals

New York.—The animals would be found if they could meet Harry and Daniel Moran, head of the Humane Society of New York, who spent 19 years helping suffering beasts, is dead.

## RESENTS TARIFF BRITAIN IMPOSES ON FREE STATE

London, Eng.—The Irish Free State quarrel with the United Kingdom has been free from the land annuities was brought before the world economic conference in an attack on the practice of imposing punitive tariffs.

The United Kingdom-Irish Free State tariff war was brought to the notice of the conference by Senator Joseph Connolly, Free State Minister of Lands and Forests, in a blunt speech before the private meeting of the sub-committee on commercial policy.

After dealing with the causes of the quarrel as the Irish Free State saw them, Senator Connolly turned to the "punitive tariff" which Great Britain was imposing against Free State goods.

"You will appreciate," Senator Connolly told the sub-committee, "how difficult it would be for our delegation to go on laboring towards a solution of tariff problems and restoration of 'normal conditions' in the future, if the tariff war were not one of the great world powers, brought to your notice."

Marine Insurance Rates

Expect Lower Rates May Be Obtained For Bay Route

Ottawa, Ont.—The report of the Imperial Maritime committee on the Hudson Bay route, which it found that the insurance rates on hulls and machinery on ships trading to Churchill could not be reduced this year, but the minimum rate was extended to apply to ships leaving Churchill as late as Oct. 7, instead of the previous limit of Sept. 30, was made public today by the department of marine.

The report appeared to be optimistic that lower rates might prevail in subsequent years if safety of the Hudson Bay route were demonstrated.

The report considered at length the ocean traffic into Churchill during the "Bright Pass," was a total loss after striking an iceberg.

Reference was made to the former report in which the committee explained that "as long as there are only a few voyages in the season, a single casualty may quite likely shatter the whole or more than the whole of the money received by way of premium."

Forest Fires In Ontario

Swept Over Fifteen Mile Stretch Near Port Williams

Port Williams, Ont.—Only partially checked by a sudden rain storm, a raging forest fire was defying efforts of 200 firefighters and firetrucks to quench it. It swept over a 15-mile stretch of cut-over timberlands, near Poland, 85 miles west of here.

Thinner fires are burning at several places in the eastern section of the Lesser Bore district, causing considerable damage, and all available men in the area were drafted to fight them.

A Canadian National Railways bridge was destroyed near Homebush, temporarily cutting off communication between Long Lac and Port Arthur.

Brighter Outlook

Twenty Thousand Men Added To Industries In The East

Winnipeg, Man.—Saying that in May alone 20,000 men had been added to industries in the east and that in his trip through the west he had found numerous new men employed in mining, lumbering and manufacturing, Hon. H. H. Stevens, Minister of Trade and Commerce, said trade and commerce in the Dominion was encouraging.

"Transportation is decidedly brighter," he said. "Carriage and passenger transportation both show marked improvement. Cattle are moving well and 40,000 head will be shipped to Britain this season."

Was Friend To Animals

New York.—The animals would be found if they could meet Harry and Daniel Moran, head of the Humane Society of New York, who spent 19 years helping suffering beasts, is dead.

### NEVER SAY "DIE"

While a few months ago some of our  
prominent business men claimed that they  
saw little hope of getting a gravel  
road from Carbon to the pole time during  
these times, they now have a different  
view. After a visit to the Minister  
of Public Works they have been  
assured that the road will have their  
attention and will probably be gravelled  
this winter.

This is almost an assurance that we  
will get the gravel, but just when has  
not been definitely stated. It remains  
for the local people to see that we get  
the gravel in the shortest time possible  
and they must keep up the agitation  
until the gravel is laid. If we do some  
other road work is going to crop up  
and may receive attention before our  
local road does.

The assurance of the Premier and  
Minister of Public Works is no sign  
that we can now lay back and wait  
until the gravel is laid. If we do some  
other road work is going to crop up  
and may receive attention before our  
local road does.

Let us all keep boosting. Every individual  
or organization that may have  
any communication with the government  
officials should never lose the  
opportunity to put in a good word for  
the road.

It appears that the more agitation we  
do the more notice we get from our  
provincial government.

### HAVE WE FAITH IN EACH OTHER?

It seems to us that there is a great  
deal of misunderstanding between the  
town and country folks throughout  
the West, much of which could be eliminated  
by a little careful study and  
co-operation. For some years The Chronicle  
has advocated a Chamber of Commerce  
or Ratepayers' Association, but we  
have always met opposition from  
some conflicting force, mainly because  
one class or the other would not join  
with his neighbor for the betterment  
of conditions. Again, we believe much  
of the conflicting spirit is imaginary  
and seems to be caused from some  
misunderstanding which either class  
has failed to overcome, or has waited  
for an opportunity to make first.

Nations have the same faults. During  
the last year or two our own  
Prime Minister and leaders of other  
nations have failed in their positions  
because they were afraid of the consequences.  
Then along comes the  
"people's champion" in Franklin D.  
Roosevelt of the United States and he  
has not been afraid to make the first  
move—resulting almost immediately in  
a friendly attitude amongst nations  
and the get-together spirit of world  
leaders is significant as the World's  
Economic Conference now being held  
in London can testify.

So we come back to our local organizations.  
They cannot and will not make  
progress unless someone takes the  
initiative and goes out and does  
things for the good of the entire community—not just for one section of it.  
You can only have co-operation when  
you have the faith in one another.  
Find a solution to the problem of  
obtaining faith in your fellow men and  
you are on the path to the best community  
in the world. A community in  
which town and country go hand in  
hand through depression and prosperity;  
a community in which the home-  
derest is first in all things, whether  
sport or business.

Do the country folk think they are  
so much better than the town folk?  
Do the townspeople think they are  
superior to the country people? Any  
one so conceited will find no welcome  
in the community.

Let's get away from petty grievances  
and pull together. Let us take the bull  
by the horns and get an organization  
embracing both town and country folk.  
An organization that will educate the  
country people to know that they cannot  
get along without the town and the  
townspeople to realize that they

# The BEST TIRE to Buy is The GUTTA PERCHA TIRE

STRONGER, SAFER CONSTRUCTION

### GUM CUSHIONS

An Extra Value

Gutta Percha  
Tires have  
cushions of  
pure gum rubber  
moulded in be-  
tween the plies  
of cord fabric,  
making a "bearing"  
which reduces friction  
and wear at these points as effectively as  
ball bearings do in machinery.

Gutta Percha Tires are carefully  
designed to give the maximum grip of the  
road surface, thus giving extra traction  
and braking power.

GREATER MILEAGE. MORE VALUE

GOLDEN JUBILEE  
50 years ago, in 1883, this Company commenced the  
manufacture of rubber goods in Toronto, Canada. Today,  
the plant has grown to be the largest all-Canadian  
rubber plant in the world. The factory employs  
1,300 people, and covers an area of 11 acres.

### TRACK BUYERS LICENSING ACT TO BE ENFORCED IN AUGUST

The new provincial Track Buyer's  
licensing Act, which requires track  
buyers of grain to pay fees to the pro-  
vince of from \$25 to \$50, in addition  
to the \$5 license prescribed by the  
Canada Grain Act, passed at the last  
session of the legislature, will come  
into force in August 1, 1933. The act  
will thus not affect the present crop  
year, but will go into effect the opening  
day of the 1933-1934 cereal year.  
The provincial secretary is to administer  
the act.

Its provisions follow:  
Every track buyer shall be the holder  
of a valid and subsisting license issued  
to him pursuant to this act, authorizing  
him to do business at the shipping point  
or shipping points mentioned in the said  
license. Providing that no license under this  
act shall be required of a track buyer in respect  
of a shipping point at which the track  
buyer is the manager or operator of a  
licensed country elevator under the  
provisions of the Canada Grain Act.

All licensees shall specify the shipping  
point at which the license is  
thereby licensed.

The total coal production for the  
province for the month of April was  
245,727 tons, a decrease of 7,875 tons  
from the same month of 1932.

Did you give the man the third de-  
gree? asked the police officer.

Yes, we browbeated and hangered him  
with every question we could think of.  
What did he say?

He dazed off, and merely said now  
and then. Yes my dear, you are perfectly  
right.

depend mainly on the farmer. Neither  
can prosper without each other.  
A little faith in one another will  
bring back prosperity more quickly  
than anything else.

### BECAUSE!

Its Gum Cushion construction is stronger and  
safer. The illustration shows the extra pro-  
tection given by Gum Cushions.

### BECAUSE!

The Gutta Percha Tire is guaranteed for  
twelve months from date of purchase for  
passenger car service against any condition  
which may render the tire unfit for further  
service, where such condition is due to ordinary  
wear and tear, or injuries thereto caused by  
blowouts, cuts, bruises, rim-cuts, under-infla-  
tion, wheels out of alignment, faulty brakes, or  
any road hazard.

### BECAUSE!

It is the tested quality product of 50 years of  
experience in the rubber industry.

### BECAUSE!

It is made by a 100% Canadian Company, and  
gives many extra values, yet costs no more  
than a tire that does not have the extra pro-  
tection of Gum Cushions.  
Insist on Gutta Percha Tires—Gum Cushioned  
—and get thousands of extra miles of tire life,  
with extra safety in each mile. No other tire  
gives such value for your money.

## That Old Troublesome Word "IF"

ONCE upon a time most people were worried a lot by "IF" A  
few still are. You can tell them if you listen to them when  
they are shopping.

"If you're sure that rug won't fade..."

"If you're positive this is pure wool..."

"If you'll guarantee these eggs as fresh..."

"If you think this washing machine will work better than the  
other one..."

"If it's... If it's..."

The trouble with such people is—they don't read advertisements.  
People who do read them do not have to depend upon "ifs" in their  
buying. They know what they are getting, because they have the  
definite, printed, reiterated assurance of the advertiser.

Most people nowadays do read the advertisements. They shop  
intelligently and quickly. They know beforehand what they want,  
why they want it, and how much they will have to pay, and where  
to go.

INTELLIGENT BUYERS SUBSTITUTE "KNOW" FOR "IF"  
BY READING THE ADVERTISEMENTS

# Sees World Wheat Surplus And Believes Curtailment Of Production Is Only Solution

In the April issue of Canadian Business, writing under the pseudonym of John Marquis, an authority on the wheat situation had an article in which, after analyzing the situation as he saw it, he reached the conclusion that no real evidence exists of a world surplus of wheat in the current time of the year of the Canadian Chamber of Commerce, John I. McFarland, general manager of the Canadian Co-Operative Producers Limited, makes a spirited reply, in which he questions the basis of this conclusion, puts forth figures to indicate that there is a surplus and argues the need of acreage reduction.

Mr. McFarland states that statistics showing that the visible stocks of wheat had commenced to accumulate before the unusually good crop of 1928 and since that time they have continued to accumulate. He quotes the International Institute at Rome to the effect that wheat stocks will experience a further appreciable increase during the present season, that exportable stocks will have risen from 500 millions on August 1 last year, to 650 millions by next August. Total international stocks for this year, he states, is estimated to be somewhere between 630 and 664 million bushels, so that the exportable carryover surplus represents 100 per cent. of the total international stock for a year. The surplus, he asserts, "becomes a quantity of paramount importance as a price making factor. Based on the present world's acreage and with average crops, he states, the world surplus will continue to increase.

As regards the position of Canada, Mr. McFarland finds fault that before the war this country supplied about 13 per cent. of the world's international stock in wheat. Since 1914 Canada has increased its share of acreage greatly. If this country continues its recent acreage and reaps average yields per acre, it will appear necessary, says this authority, that Canada must secure very close to 50 per cent. of the world's trade to displace its crops. Do you think, he asks, that Canada has the resources to leave, he inquires, that other countries are going to leave to Canada the privilege of supplying this demand?

What is the solution for the conditions described? According to Mr. McFarland, the only method by which there may be any permanent advance in prices is by a world-wide reduction in acreage. In such a manner, he thinks, Canada would be a leader because in the past twenty years she has increased her acreage by a much greater percentage than any other exporting country. He goes on:

"The Laws of Nature of the Act of diminishing returns tend to reduce production on this over-extended acreage, but such reduction can only be of a temporary nature, because after all those years of over-production, they will make their average. Therefore, it appears that there is only one way of permanently correcting the unsound conditions and that is by the actual reduction in acreage."

Mr. McFarland buttresses his contention with the statement that the United States has fed an unusually large quantity of wheat to animals during the last three years—a quantity sufficient for a year's world supply. He points to this as an answer to the people who say there is an over-production and that the problem is only one of underconsumption.

The viewpoint thus set out is in the viewpoint of a large element in the West which favors agreement for curtailment of production and control of distribution.

**Rail-Bus Is Specialty**  
The "rail-bus," a new type of vehicle with a 100-horsepower steam engine, has just been placed on the Brighton-Devlin Dyke line of the Southern Railway of England. It will accommodate 44 passengers, and in test runs has speeded over 60 miles an hour.

The distance from the earth to the most distant known nebula is 900,000,000,000,000,000 miles or about 140,000 light years. This is the greatest length ever actually measured.

"What is the best thing to do when suddenly faced by an infuriated bull?" asks a correspondent. About fifteen miles an hour.

## GOOD LOOKING HOME WEAVER HELPS IMMENSELY—MAKES KITCHEN CHORES EASY

Every woman knows she can't have too many home weavers that will tub and tub and always keep up smiling. And today's model is just lovely. The dress is suitable for the house, garden, porch, morning, etc. And incidentally, it's decided by slitting to the heavier build. The diagonal hip seaming reduces bulk. The dress is dark blue and white dainty. The apron is white dainty which is used for the dress trim. And isn't the one-piece apron attractive? And it won't slip off the shoulders either. For the suspended apron is useful besides being beautiful. Design No. 910 includes the dress and the apron in sizes 16, 18, 20 years, 30, 36, 40, 42, 44 and 46 inches bust. Size 16 requires 2½ yards of 30-inch material for dress with 1½ yards of 20-inch material for apron and dress collar. Price of pattern 20 cents in stamps or coin (not in paper). Wrap carefully.

## How To Order Patterns

Address: Winnipeg Newspaper Union,  
170 McBurney Ave., Winnipeg

Pattern No. .... Size .....

Name .....

Town .....

City New Caled Island and is Not  
Turkish Capital

The first two things to remember about Constantinople nowadays is that it is not the capital of Turkey and that it is not called Constantinople. The capital is Ankara where the President-dictator, Mustafa Kemal, lives on his estate "Poonchuk" and Constantinople is called Istanbul. It is a city with a million inhabitants and about fifty thousand starving dogs, but since the time they were taken off to a deserted island with no food or water, so that they all ate each other until the survivor died of thirst.

**One Great Advantage**  
School days being once more over there will be many boys and girls with nothing to do and no place to go. Here is where the companies with adventures over city life. The farm boy or girl can be given some responsibility or some task that will be useful to him and not disastrous or costly to the parents. Farm youth do not have to spend their vacation days in idleness—Farmer's Magazine.

**Used Discretion**  
When a herd of 30 elephants paid no attention to the furious blowing of a locomotive whistle as they leisurely crossed a railway track between Tanganyika and Gambia, Africa, the engineer had to stop his train until they were out of the way.

To utilize surplus sugar, Czechoslovakia is converting it, mixed with bran, into a kind of animal fodder for horses, cattle and pigs.

## Distinguished Canadian Artist

Late Robert Holmes

Three years ago Robert Holmes, artist, died. Alice Wetherell writes of the painter of wild flowers in The Challenger: "One day in 1868 a young man from the Kawartha Lakes district, gave a trimming bonnets with artificial flowers, and settled down to housekeeping with her young husband in Camlington, Ontario. She planted seeds and bulbs and her garden became the best in the village. Not much wonder that were Robert imbued love of beauty. It was therefore not so strange that when he drew pictures for the first number of the Art Student's league calendar, he should choose as his subject the flock doorway to that house—his mother, inside, washing dishes, and outside directly in her line of vision, the grapevine, the lilacs and poppies massed against the walls."

"Not even remarkable that the lad, brought up with such a background, should finally become Canada's most distinguished painter of flowers, and the greatest painter in America of wild flowers in their native setting."

"The fireweed, loose striped orchid and Indian pipe, in Holmes' water colors, are never stiff poses, but always seem to be growing in the woodland haunts where he found them. And the scene seems to have power to pass this subtle sense of life into what are usually regarded as 'still-life' pictures. Yet it took weeks to get to the picture that made you smell the perfume and feel the breeze as he did."

He was a student of the Toronto Art Society and of the Royal College of Art in London. He chose Canadian wild flowers for his designing clothes as a specialty native Canadian motif on which to base their work. With the words 'flowers' on his lips he died, and his wife, Alice, buried in a little lot beside the woods where he so often wandered as a boy."

## Want African Colony

Germany Seeks Room For Expansion

And Means To Pay Debts

A memorandum prepared by Dr. Alfred Hugenberg, German minister of economics, for the economic committee of the world conference, said there were two possible ways of increasing Germany's capacity to meet her international debts—first, by giving her an African empire, and second, by opening other new territories "to lands people which has not enough space in which to live."

## Money From Trees

Austrian, strange as it may seem, is teaching its young people that money grows on trees. Under adult guidance, state school children of Vienna have set out 4,000 acres of saplings that will be worth \$30,000,000 on maturity. Profits from the sale of the timber will be used to provide scholarships, libraries, radio and sports materials—Christian Science Monitor.

AFTER THE RECORD HOP FROM SPAIN

Showing little effects of the strain of their hazardous flight, Captain Mariano Berthel and Lieut. Joaquin Collar, Spanish army flier, are shown at Camaguey, Cuba, on the completion of their record flight from Havana to Camaguey, Cuba, in the plane "Cuatro Vientos" (top). Their route took over 4,000 miles of ocean.

# Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

## Price Of Life Killing

Famed Embassy Club Hit By Rich Fod

Jackson's "High Life" cat, the most famous cat in Mayfair, and perhaps in the world, is dead. Perhaps the phantom of the movies, could not hold a candle to Jackson. He was an aristocratic Kings paid court to him, but he seldom deigned to notice them.

Jackson was the mascot of the famed Embassy Club in London's Bond Street. He figured in novels, caricatures and innumerable gossip columns.

Now like other martyrs to the cause of High Life, he died of acute leukemia at the comparatively early age of eight.

It is impossible to estimate how much smoked salmon, fete gras, leg of chicken and caviare he ate in the eight years he associated with the elite who passed through the portals of the Embassy Club.

Guest after distinguished guest tried to pay court to him with tidbits. Often he turned disdainfully away, but not often enough. It got him in the end.

Lament green eyes, arched black tail, and a ruff, Jackson walked aloof. In a sudden fancy he would sit on the knee of a millionaire or the lap of a film star, and then he would move him. Sometimes he would jump through a human hoop formed by a waiter's arms, his only prairie trick, but only on rare occasions.

Jackson Junior, a small black kitten, now reigns in his stead. At his first appearance, he tasted caviar, blue trout and quail, and he found them all good, far too good for any kitten which hopes to live past the age of eight. If only his absent parent could warn him of the perils of rich living—Jackson the "High Life."

## Coral Not A Rock

Every Inch Is Built By Tiny Sea Animals

Coral is not a rock, it is made of skeletons of tiny animals. In reality an animal colony, something like a sea-anemone jelly-like and soft, and of olive brown color. It has many tentacles on its mouth for any creature which hopes to live past the age of eight. If only his absent parent could warn him of the perils of rich living—Jackson the "High Life."

## Leaves Nothing To Chance

Electricity Keeps Tab On Crows At Chicago Fair

Electricity keeps Century of Progress officials at Chicago informed as to just what the number of persons inside the grounds is at any time. Turrities at the various entrances are equipped with counting and recording device with a central trial in the superintendent's office. A glance at the dial tells how many persons have entered the grounds, how many left and what entrances and exits were used. The information is used in distribution of guards and change at entrances; to notify trams when to leave the grounds; to rush from the grounds and at what exits, and to keep concessionaries informed of the size of the crowds so they will not run out of supplies.

## Needs a Pension

Hadi Bey, a Turk, has 43 children—38 boys and five girls. This is believed to be a world record. The Sultan used to give Hadi a yearly bounty, but this has been stopped. Hadi has now applied to Mustafa Kemal Pasha for a pension.

British railway passenger cars have sufficient seats to accommodate more than one-twentieth of the population.

A petrel is defined by an expert as a bird as a married man who has a car and a couple of sons.

## Present Year Marks The Diamond Jubilee Of The Royal Canadian Mounted Police

This year is the diamond jubilee of the Royal Canadian Mounted Police, formerly the Royal North West Mounted Police. This famous force was established in 1873, following the acquisition of the western prairies in 1870 by the Dominion of Canada. The several Indian tribes at that time were demoralized by liquor sellers and by tribal warfare, a nature to discourage settlement by white persons. The Force, only 300 strong at the outset, marched in 1874 right across the prairies from the Red River in Manitoba to the Rocky Mountains, the entire march being more than 2,000 miles and through country which in part was then unknown. The Indians were so impressed that a series of treaties were concluded, and the Government was enabled to assume effective control of the Indians.

In addition to discharging police duties and undertaking such executive work, such as guarding against prairie fires in the early days, visiting Indian reserves, discharging many other responsibilities, the Force had a share of military duties. The original march across the prairies was a military task, performed in a military manner. During the Red River expedition, the Force bore an active part; a number of officers and men were sent to the South African War; two squadrons for service in France and Belgium and one in Siberia during the Great War were furnished.

At present, 2,200 men and 2,200 horses of the Royal Canadian Mounted Police is now distributed in the way best suited to perform its many duties. It is found that the international boundary, where it aids in protecting the revenue and preventing smuggling of goods of all kinds of undesirable. It is located on or in the vicinity of Indian Reserves to maintain good order, and to aid in the enforcement of law and order. It occupies many lonely posts in the North West Territories and the Yukon, and along the Arctic and the Pacific coast. It is found in centres of population at any point where there is an indication of trouble arising likely to affect the peace and well-being of the country. These officers and men in their uniforms of scarlet stand for the maintenance of order and government. For 60 years they have been the guardians of the law and administering the peace throughout the Dominion of Canada.

## Historical Gardens Roses

Origins Of Beautiful Hybrid Perpetual Roses In Canada

At the end of the eighteenth century, when the climate of this country was brought to Europe, says the Dominion Horticulturist, Dr. Macoun, in discussing the history of roses in Canada, the hybrid perpetual roses in China, rose with French and Provence roses were raised. They were called Hybrid China, but took after their European parents in that they flowered only once in the season. These hybrids and the damask rose were then crossed, and Rose du Roi, a damask perpetual, was introduced about 1819. This rose was called perpetual because it had a second blooming season. Six years later, Gloire de Rosanes appeared, followed by rapid improvement of this class, and in the fifties such garden favorites as General Jacquemont and Jules Margottin were introduced. In Canada many of the hybrid perpetuals bloom once only in the season.

## Wrapper And All

The general practice to wrap things in cellophane has its disadvantages. Take the case of the sighted man who ordered a ham sandwich at a lunch counter for example.

"Was that sandwich quite fresh that you sold me?" he asked. "Quite, sir," replied the lunch counter attendant. "Each one is wrapped in transparent, airtight paper."

"Good," said the customer. "I wish I'd known that."

## Bit Of a Puzzle

"I'm glad you're so impressed, dear, by these explanations I've been making about banking and economics," remarked the economist. "Yes, darling. It seems wonderful that anybody could know as much as you do about money without having any of it."

had  
complexion?  
Act at once!  
Only a clean  
skin can give  
you a deep  
pink glow  
every morning.

CHAPTER XII.—Continued.

She held his hand a moment in her warm clasp, thinking of father lying dead at Resolution, of Alana's noble struggle to save him, of Haskell breaking her father's will to live. It was some solace to know that she had helped Alana to trap that for the guilty Inspector, a deadly trap that Haskell only walked into.

As she quietly wished him good luck, in her heart she was fiercely saying to him, "God go with you, Alana." And because she had recently resolved not to see him again before she left, she meant her words not only for the stormy hour of him, but for all the years of his life.

Alana strode into the cabin in a savage fighting mood. He had risen from a sick bed to come to Endurance before William left, and he had sworn he was going to track Haskell. The inspector had forced him out of the Mounded, had caused Larry to be strangled for life; had refused protection to Joyce in her desperate need; had made a scapegoat of Dave MacMillan to save his face, and more than anyone on earth he was responsible for that sorry tragedy at Resolution.

Almost the only hope Alana had was that trap which he and Joyce had planned—an idea born in Joyce's quick brain and developed during those three days she had nursed him.

When he went in, he found Williamson sitting at a desk, waiting. Haskell did not move; but Williamson, considerate of his wounds, drew up a chair and invited him to sit down.

"Won't you give us the story of your patrol, Baker?" he requested kindly.

Alan countered: "My story doesn't begin with this patrol. It begins last fall, when this gentleman here was down north. I want to tell it clean, from then till now."

"That's your right," Williamson assented.

Alan hoped that his story, by the sheer blunt truth of it, would carry conviction. But when, and how, the old officer did not comment. The silence was forbidding. Almost in desperation, Alan took up a corner of matters that lay very near his heart.

"There's two or three favors I want to ask of you, sir. Since they're not in my own behalf, you may agree to them. One is about Chick Wexley, the man we brought in. I want to put in a word for him. He deserves heavy punishment but he shouldn't be hanged. He gave us some precious information. We might never have saved Joyce MacMillan if he hadn't."

**TIED AND IRRITABLE?**

Take Lydia E. Pinkham's Vegetable Compound. It soothes the nerves and helps to build you up. You will eat better, sleep better, lose bad habits, and feel like a new woman. Remember that 96 out of 100 women say, "It helps me."

It helps you too. Liquid or tablet form, 50¢ per box.

W. N. U. 2000

hadn't. If it's impossible for me to be present at his trial I want to turn over to you an affidavit in his behalf. Then, about Featherston, my partner in this patrol. He stole some government property and broke some flying regulations. But he made the whole thing possible, he threw in with me without a thought of pay, he risked his life a dozen times. We're in position to restore that property or else pay for it in full. Will you get Featherston out of this jam?"

"How about yourself, Baker?"

"Well, I don't want to be jailed, if I can't help it. But I suppose your favors stretch just so far. I was the instigator, and if anybody has to pay, I'm the one."

Williamson was thoughtful. Few times in his career had he ever allowed motive, however worthy, to be excuse for breaking the law. But as he glanced at Baker, who was wounded, maimed in one hand, still pale from loss of blood, he thought what a heartless travesty of justice it would be if Baker were imprisoned. Whatever the truth of his trouble with Featherston, great fact remained: that he had gone on a thankless, prodigious patrol and had run the criminals to earth.

"I'll do what I can for you both," he promised, with no reluctance. "When I get back tomorrow, I'll talk to the Edmonton officials and try to get those charges non-prosecuted. But you and Featherston see to restoring that property."

Alan promised: "We won't fail you on that. It's mighty fine and square of you." After a moment, he went on: "Considering all you've agreed to, I hate to ask still another favor. But I've got to speak up for Haskell and Pedoulat. They have charges against them, serious and true charges. But there's this to be said, sir. Neither man deserted. They intended to return here at the moment our patrol ended. They rendered a tremendous service to the government. They were true to duty in the highest sense. We came back here, you going to look at the good they did, or at nothing but the bad?"

Williamson did not answer. He felt the human justice of Alan's appeal. It seemed to him that the matter deserved a more serious consideration. Those men had been under Baker's sway, and he knew what a powerful influence Baker had over his men.

Thinking deeply, he gazed through the window, down upon the dark sea. In this tangled affair, he was a mere task to judge wisely, to do the right thing. Baker's long patrol, his indomitable courage in going after these men, his relentless drive in hammering his daring patrol through to success—the whole thing was a splendid record. In his forty years of experience, he had never seen a more efficient piece of work. It was like Baker, like the brilliant sergeant who he once had trusted and fought for.

But the rest of that story, his trouble with Featherston, his judgment not to accept that as true. From start to finish Baker's account was an utter conflict with Haskell's; and the stern old officer, judging with impartial mind, Haskell's story seemed more credible. Quite plainly, Baker had been a personality of 79 which probably had warped and twisted his story out of all semblance to the truth.

One thing Williamson did know beyond any doubting: Baker's account clashed with Haskell's all along the line. One of these two men was an out-and-out liar.

In the tightening silence, waiting for Williamson to start probing, Haskell looked out along the terrace and saw a thing which struck him with chill conviction. The doorway to the stern officer's quarters; Pedoulat and Bill Hardrock came out, bringing Larry Young with them, their hands behind their backs, their half-leading, half-carrying their crippled partner, they were making straight for the cabin.

When they trod into the room and Williamson heard them, he turned, frowning and demanded:

"What do you men want?"

"Sir, we came here to put our paddles in." Bill started bluntness. "We knew you were in trouble between Alan and the inspector."

"Your counsel wasn't asked. This matter is between Baker and Inspector."

"Bill, don't try to run a buck. I'm not a material that this unexpected move of his three men might kill any chance to trap Haskell."

"If the superintendent doesn't want him here, obey him and go!" Bill stubbornly refused. He said to Williamson: "You've got a name, sir, for the man who lost his leg. He's in your division a square out and seeing all sides of an argument. I don't think you'll kick us out without hearing what we've got to say. [This is as much our fight as Alan's.]"

"We've got to pay, too, for the inspector's act. Here's one of our trip-pled for life because the inspector neglected us on that patrol with some foot orders. After a while like that, we're not allowed to shut up and take it."

"Bitter down!" Williamson bellowed. "I'm going to get to the bottom of this. When your time comes I'll hear what you've got to say. Now Baker, I want you to answer some questions. What made you split your detail on that first patrol?"

"Haskell ordered me to, sir. He ordered me to follow both branches. When I objected, he threatened to beat me and keep me here at the post."

"That's a lie!" Haskell challenged. "I allowed him to do as he thought best. He purposely made a failure of that patrol. I don't ask you to take my word. Corporal Whipple was here in the cabin, and heard our talk. And Baker, over his signed statement, admitted to responsibility."

"What proof have you got, Baker?" Williamson demanded.

Alan kept silent, deliberately allowing his silence to damn him. Williamson's probe was leading in the right direction, leading toward that deadly trap.

To Alan consternation Bill Hardrock burst out: "Proof! He's a blue blazer! Alan was half-right, all the way up the Alaska, because of them. He felt he was being forced to take us men into a terrible danger. We didn't know it was crazy to split up."

Williamson silenced him. "You're merely making an assertion, corporal. You have no proof. Baker, do you admit responsibility for that patrol?"

Alan shook his head. "No, I—don't, but he stammered, and he signed it. But I—I had to."

"Yes, to get out of the Mounded. He wouldn't let me buy out unless I did sign."

"Why under heaven did you want to buy out that fast and so hurriedly?"

"I wanted to be free," Alan led on step by cautious step. "I wanted to go after those men."

"Baker, look here," Williamson said sternly. "You infer you wanted to go after those men so badly that you were willing to buy out after a record and sign a lie. Why then wouldn't you co-operate with Haskell to get them?"

"Well, sir, he—he wouldn't co-operate."

"I can't believe that. He tried to help you buy out after a record bought out and were on a private venture."

"When was that?" Alan queried. "As a Traverser Lake."

"It was as he was trying to help us. I didn't—ah—have that impression at the time, sir."

"He even shot signals for you to wait."

"Bill Hardrock grows luridly. "Of all the long-tongued lies, that's the best of 'em all!"

Alan allowed the lie to go unchallenged. If Haskell got by with that one, he would be bold and unwary. (To be Continued.)

**Veteran Glee-Trotter**

Cleveland Man at Eighty-Six Starts On Another Trip

D. Jay Colver has packed his old kit bag and started off on another joint, this time to celebrate his 42nd wedding anniversary.

Colver is 86. He is said to be the most widely traveled man in the world. He has departed from his home in Cleveland, Ohio, exactly 79 times for foreign parts, and has covered something like 3,000,000 miles.

His travels have been mostly in the United States, but he has been abroad, according to Colver, so he got rid of his business a few years ago to concentrate upon the call of wanderlust.

"I got settled down about a year ago, but then I got to ailing and decided a trip would help me out."

Consequently, Mr. and Mrs. Colver sailed together to celebrate their wedding anniversary. Offhand, Colver will not give the following list of times around the world; twice around Africa; seven times around South America; three times to Japan and China; 30 times to Florida and Cuba, and 31 trips to the Pacific Coast.

Shipments of Canadian raccoons which was sent to Finland some time ago for breeding purposes is reported to have been successful. Now all Finland needs is a cage.

"Some men are born great, some achieve greatness, and others just grate on you."

**Effect Of Depression**

Not Very Soothing To The Nerves In The Opinion Of Some

A New York doctor says the depression saved the world from a nervous breakdown. We were traveling too fast, he thinks, financially and otherwise, and could not have stood the strain. It is in his opinion that the mental hospitals filled up during the boom years. He expects fewer patients in years to come.

Authority is always to be respected and questioned with due reserve. Yet one would like to see the boom explain the delicate epidemic that has swept the continent in the last three years. People do not take their own lives when they are in a state of tranquility.

The doctor doubtless knows whereof he speaks when he says the boom years were hard on the nerves. He is on questionable ground when he suggests the depression has ushered us into less distracting conditions. The facts, as recorded in the daily record of self-inflicted wounds, seem to point in the other direction.

The jig-saw puzzle has given way to the pastime of hunting among the debris of deflation for compensatory blessings. Unless it is a blessing that life is less attractive than it was, nobody has yet found them.

**Gay Colors For Bridges**

Structures Of Future Will Be Artistic and Colorful

Bridges of the future will excel anything yet known in beauty and size, single length and dual bridge spans of forbidding battlement gray will give way to gay, bright colors, Dr. D. B. Steinman, New York consulting engineer, lectured in an address at Pittsburgh.

"New metals are being tried," he said. "Aluminum will be more extensively employed in future bridge erection. Bright paints of dull black, dark, forbidding battlement gray will give way to gay, bright colors, greens to match the landscape, relieved by bright stainless steel. New lines will express the functions of the bridge."

The old cross-bracing principles are being eliminated.

**THE RHYMING OPTIMIST**

By Alice Michalson

**READS**

Beads of every color,  
Gay as wild bird wings;  
Why do women prize these  
Half-baked things?

Beads as blue as heaven,  
Beads as white as milk,  
Slowly rising, falling,  
Over heads and like me too.

Beads of jet and amber,  
Coral, pearl and jade,  
Beads to match each woe,  
Of a changed mind!

Beads for love and laughter,  
Beads for grief and tears,  
Beads to make the message  
Of a woman's prayers.

**Steps To Delinquency**

Seven Stages Are Set Forth By Probation Officer

John J. Smith, chief probation officer of Middlesex County Superior Court, Massachusetts, lists seven steps in the development of the average youthful delinquent's career. The steps are:

1.—Develops inferiority complex at school because teacher fails to sympathize with him as a subnormal child.

2.—Becomes truant and associates with "bad" companions.

3.—Takes to petty pilfering.

4.—Begins breaking and entering.

5.—Steals automobiles.

6.—Becomes racketeer, or boot-legger, and carries gun.

7.—Turns to major crimes, such as holdups.

**INFLY FIRESTONE**

gives you all these  
**EXTRA VALUES!**

**1** NEVER before have so many people been changing over to Firestone Tires. They know that they can buy Firestones with full confidence of getting the most mileage for the least amount of money, for only in Firestone tires can you get all these extra values—that give 25 to 40% longer life—at no extra cost.

**2** Gum-Dipped Cords

**3** Balanced Construction

**4** Non-skid Tread with 25% more wear

Firestone tires are fully guaranteed for 12 months but made to last much longer.

In these days when you have to make one dollar do the work of two, be sure you get the most out of your money. See the nearest Firestone Dealer today. Let him convince you of the safety, strength, safest and most economical of tires.

**Little Helps For This Week**

"If you're then being evil know how to give good gifts to your children, my friends. For even as the fire comes out of the wood, so the good comes out of the evil."

How this great love has compassed our hearts and our need. We know not, but He knoweth. Therefore O Heavenly Father Give what is best to me. That I may be the want unawares, As offerings unto Thee—Amen.

Whatever we ask which is not for our good He will keep back from us. And surely in this there is no less of love than in granting what we desire. Will not the same love which prompts you to give a good thing prompt you to keep back that which is evil. If in our blindness, not knowing what to ask, we pray for things which would turn in our hands to sorrow, will not our Father out of His love deny us? How can He suffer us to have if our wishes could pass at once into reality, if we were endowed with a power to make them so, that we desire? If our sudden longings were always granted. One day we shall bliss Him. That He has denied that prayer for what He has granted.—E. Manning.

**Involve Hills Sum**

Here are the bills which the United States sent out to the credit of the Great Britain, \$75,000,000; France, \$40,785,000; Italy, \$13,545,000; Poland, \$25,000,000; Belgium, \$3,325,000; Czechoslovakia, \$1,500,000; Rumania, \$1,000,000; Estonia, \$284,322; Yugoslavia, \$275,000; Finland, \$248,502; Lithuania, \$119,961; Albania, \$132,500; and Hungary, \$28,500.

**Stamp Worth Nine Million**

Stamps valued at more than \$9,000,000 were on display at the international philatelic exhibition which opened in Vienna, Austria, on June 24. One thousand prominent stamp collectors took part in the exhibition. What is believed to be the only specimen of the British Queen's one-cent stamp was shown.

**YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS**

**Wake up your Liver**

—No Colic needed  
When you feel low, depressed, run down, or out of sorts, it is because your liver is not working properly. It is the liver that cleanses the blood and makes it healthy. It is the liver that makes the bile which is necessary for the digestion of food. If the liver is not working properly, the blood will be impure and the body will be out of sorts.

Do not let your liver get out of order. Keep it healthy and you will feel better. Take a course of treatment with a liver-purifying medicine. You will find that it is the best way to keep your liver healthy and your body in good condition.

The ChronicleMr. and Mrs. A. F. McKibbin and  
Mrs. S. F. Torrance were Calgary vic-  
tors on Monday and returned the same  
day.The Carbon school sports will be  
held tomorrow (Friday) afternoon and  
schools from various parts of the dis-  
trict will participate.Mr. and Mrs. A. Thomas were Cal-  
gary visitors last Friday.Saturday is Dominion holiday and  
all places of business in Carbon will  
be closed. Do your week end shopping  
early.Dr. and Mrs. McFarlane, Mrs. Mc-  
Grade, Mrs. Bremner and Miss Dot  
McIntyre were in Calgary the first of  
the week.A large number of residents of the  
Carbon district attended the public  
meeting in Three Hills on Tuesday eve-  
ning when Wan, Aberhart of Calgary  
outlined the Douglas System of Econ-  
omics to an audience of about 500  
people. The meeting was held in the  
Three Hills curling rink.Mr. and Mrs. S. Nelson motored to  
Cardston on Sunday.Arlid Reid moved his sheep to his  
pasture land at Stathala on Tuesday  
of this week.The Nanton News issued a special  
25th anniversary edition of its publi-  
cation last week and the issue is a  
credit to the town of Nanton and its  
publisher, Mr. A. E. Jessup. The issue  
was well represented by the business  
places of Nanton in its advertis-  
ing columns and a complete history of the  
town and district may be gained from  
reading the write-ups in the news  
columns.Are you prepared for the big dance  
in the Farmers' Exchange hall, Carbon  
tomorrow night. This dance is being  
sponsored by the Carbon Tennis and  
curling clubs and your patronage will  
be appreciated.CHILDREN LOVE THIS CANDY  
LAXATIVEWhy give your children harsh, bitter  
doctors when there is a gentler way to  
relieve constipation. Resall Orderlies  
are the original chocolate phenolph-  
thalein laxative. Just as tasty as candy,  
and they are noted for their gentle-  
ness—their natural non-irritating cor-  
rective action. Resall Orderlies are non-  
habit forming. And they are safe  
for women at all times. Go to McKillop's  
Retail Store, Carbon, today and  
ask for Resall Orderlies. Tin of 50-cs

## Snicklefritz

Ah—Have you ever been pinched  
for speeding?

Ruff—No, but I have been slapped.

Run away my lad, provided the an-  
ger who was unmerciful.  
Small Boy—No offence sir. I just  
wanted to say that father keeps a fish  
shop near the station.Two little boys had misbehaved in  
school, and as a punishment the  
teacher told them they would have to  
stay late, and that each must write  
their name one hundred times. On  
hearing this, one of them burst into  
tears. Fair's fair, he cried. His name  
is Lee and mines Katsenbaumstein-  
berber.A negro minister discovered two  
men playing cards on Sunday—and for  
money.Bastus, said the minister, don't run  
your life wrong to play cards on de  
sabbath?Yes, parson, answered Bastus, de-  
finitely, but believe me, ah's paying for  
mah sins.Teacher—Children, can any of you  
tell me what is the most dangerous  
part of an automobile?

Tommy—yes, miss, I can. The driver.

See that star up there? Well, it is  
bigger than this whole world of ours.  
Farmer—It must be. It keeps off  
the rain.At the end of the school term prizes  
were awarded. When one of the pupils  
returned his mother chanced to be en-  
tertaining callers.Well, Heckie, said his mother, did  
you get a prize?I didn't exactly get a prize, respond-  
ed Heckie, but I got a horrible men-  
tion.Two Irishmen were told when they  
landed to go to the bush and find  
money growing on trees. On arrival  
they set out to find a bush and to  
their pleasant surprise arrived at a  
tree and sure enough in its branches  
there was a bar-of-money.Pat climbed the tree with a stick  
to knock it off and Mike was to wait  
to catch it, but to Mike's surprise Pat  
came down first, started to run, and  
called to Mike:"That's it, Mike, that's not money,"  
said an Orange bloke.
